Summary: 0011267: WORK PKG: ECFP Phase 2 : Re-orientation of the image matrix

Description: Change the image matrix so that the current most up to date image (with respect to current UTC time) is in the top left grid box.

The next time period should be to the right.

Move left to right then top to bottom.

Use only 3 columns.

Old images should expire from the page.

Steps To Reproduce:

| Larry Greenwood | Change the image matrix so that the current most up to date image (with respect to current UTC time) is in the top left grid box. The next time period should be to the right. |
| 07-11-12 21:48 | Move left to right then top to bottom. Use only 3 columns. Old images should expire from the page. These changes are for |

Files Changed:
awc/site/application/modules/products/controllers/EcfpController.php
awc/site/application/modules/products/views/scripts/ecfp/display.phtml
awc/site/application/modules/products/views/scripts/ecfp/partials/ecfpPartialLoop.phtml

Technical Impact:
Low.

User Impact:
Low.

Changes are currently available for test at http://bcaws.aviationweather.gov/products/ecfp/ [^]

Testing:
1. Go to /products/ecfp/
2. Validate image matrix flows left to right and "day column headings" are no longer visible. Verify top left image is "current" with respect to UTC time.
